

JESON PARADO

Full Stack Developer

Full-Stack Developer with 7+ years of experience building scalable web and mobile job platforms using Next.js, React Native, and Supabase (PostgreSQL).

Experienced in developing worker applications, internal admin systems, and job-matching platforms for both healthcare and non-healthcare industries, with strong expertise in API integrations, AI-powered workflows, and real-time systems.

Focused on delivering fast, reliable, and user-friendly applications that streamline hiring and application processes.

SKILLS

- Android Studio (Java , Kotlin)
- Xamarin, Visual Studio
- (C#,VB,Asp.net) IOS Mysql ,
- Sql server, Oracle, MongoDB
- , Firebase
- NodeJS, Python
- Javascript, PHP
- HTML, CSS Github, Azure
- devops Bubble.IO, Zappier,
- Zoho,supbase, AI grok,
- Mapbox, Next.js,tailwind
- xano,n8n,make,highlevel

EDUCATION

BACHELOR OF SCIENCE IN INFORMATION TECHNOLOGY

Holy Cross of Davao College
2011 - 2015

EXPERIENCE

Zipstaff inc

Full Stack Developer/Teach Lead

December 2024 - April 2026

- Developed worker application systems allowing users to easily apply for jobs via web and mobile
- Built job marketplace platforms supporting healthcare and non-healthcare roles
- Created internal admin dashboards for managing applicants, job listings, and workflows
- Designed scalable backend architecture using Supabase (PostgreSQL, authentication, real-time updates)
- Built mobile apps using React Native and web apps using Next.js
- Implemented AI-powered features (resume parsing, document validation, automation workflows) using Grok and ChatGPT
- Integrated APIs for notifications, payments, and communication systems
- Ensured responsive, accessible UI across all devices

EXPERIENCE

WEB DEVELOPER

Conserva Care LLC

March 2024- November 2024

Strong understanding of Bubble's editor, data architecture, workflows, responsive design, and plugin ecosystem.

Able to debug complex workflows, identify root causes, and implement effective fixes.

Creating and exposing REST APIs in Xano to support secure, efficient communication between Bubble and external systems

Experience mapbox location api, AI grok for checking details for client requirements

data sync from bubble to xano , using canvas template

.NET DEVELOPER

DCBank

May 2023- Feb 2024

- Work closely with database administrators and the rest of the development team
- To ensure that accuracy and performance of systems are maintained.
- Manage and maintain multiple applications including support, configuration, documentation, testing and upgrade with a strong focus on change management processes. Support customers and end users, and work with the rest of the development team to resolve application issues.
- Set up user accounts and assist with the maintenance of test, development and training environments for critical applications.

EXPERIENCE

BUBBLE DEVELOPER

MVP.Dev

February 2022 – April 2023

- Design, develop, and deliver applications on the Bubble.io platform (training provided)
- • Ensure the best possible performance, quality, and responsiveness of applications
- • Identify bottlenecks and bugs, and devise solutions to these problems
- • Help maintain code quality, organization, and automatization
- • Technical customer support for various platform issues
- • Other programming tasks that may arise, including working with no-code platforms
- Setting up secure connections with OAuth2, Bearer tokens, or API keys,
- Parsing dynamic JSON responses,
- Creating backend workflows for automated data exchange and synchronization between platforms.

MOBILE DEVELOPER (IOS/ANDROID)

Accenture Inc.

May 03 2020 –December 15 2021

- Assigned to the application development and maintenance.
- Responsible solely to the development of the whole project. I did the ordering system, inventory, sales and development of the android application for admin.
Recheck fixes and issues whenever an update is available.
- Analyzes data and checks whether the data complies to existing industry
- and practices.

BACKEND DEVELOPER

One Corp

August 2016 - December 2019

- Responsible solely to the development of the whole project. I did the Record Management for Visual studio(C#)
- Assigned to the application development and maintenance.
- I developed "E-hatud" app using Cordova for web and Xcode, and Android Studio for mobile.
- Resolved difficult problems, improved operations and provided exceptional client services.
- Developed Payroll Management System using PHP and Mysql, and for leave and attendance using Android.

SYSTEMS DEVELOPER

Technology Innovation Inc.

September 2015 - February

2016

- Responsible solely to the development of the whole project. I did a "Barangay System".
- Developed the project using Visual studio (C# , SQL server and MySQL).
- I was assigned to the application development and maintenance.
- Worked closely with clients to establish specifications and system designs.
- Provide client support.
